

UPS Healthcare

Quality Focused. Patient Driven.

UPS® Premier

Advanced technology provides priority handling for critical healthcare shipments

Time matters. Priority matters. Reliability matters.

**Your shipments matter the most,
because your patients matter the most.**

UPS® Premier fulfills an unmet need.

UPS uses technology to help bridge the gap between the current small package environment and highly specialized handling for healthcare shipments.

PRIORITY LANE

Scalable prioritization for small package shipments without the white glove cost

EXCLUSIVE SENSOR TECHNOLOGY

Next-generation technology enables real-time physical visibility and a priority path throughout the network

RISK MITIGATION

Controlled product protection and priority handling during transit help to limit negative impacts to shipment integrity and viability

COMMAND CENTER

Globally positioned teams provide 24/7 monitoring and intervention coverage for shipments
