UPS® PICKUP POINT

BEST IN-CLASS PICKUP EXPERIENCE AND VISIBILITY PLATFORM

UPS® Pickup Point Placards are uniquely designed for customers with a many-to-one reverse logistics need.

- 1 Identify locations and times for pickup to increase your first-time pickup success with scheduled or on-demand pickup options.
- 2 Scan a QR Code when a pickup is needed and to sign up for alerts and notifications.

CONTROL

Self-serve and take control of the creation of your own pickup points and accelerate onboarding of new sites

RELIABILITY

Your UPS driver is not planned to arrive after the posted time, so each location will be able to plan for pickup at the scheduled time

CONSISTENCY

The clearly-marked pickup point allows staff members to know where to leave shipments and makes it easy for the UPS driver to quickly locate, scan and pick up packages

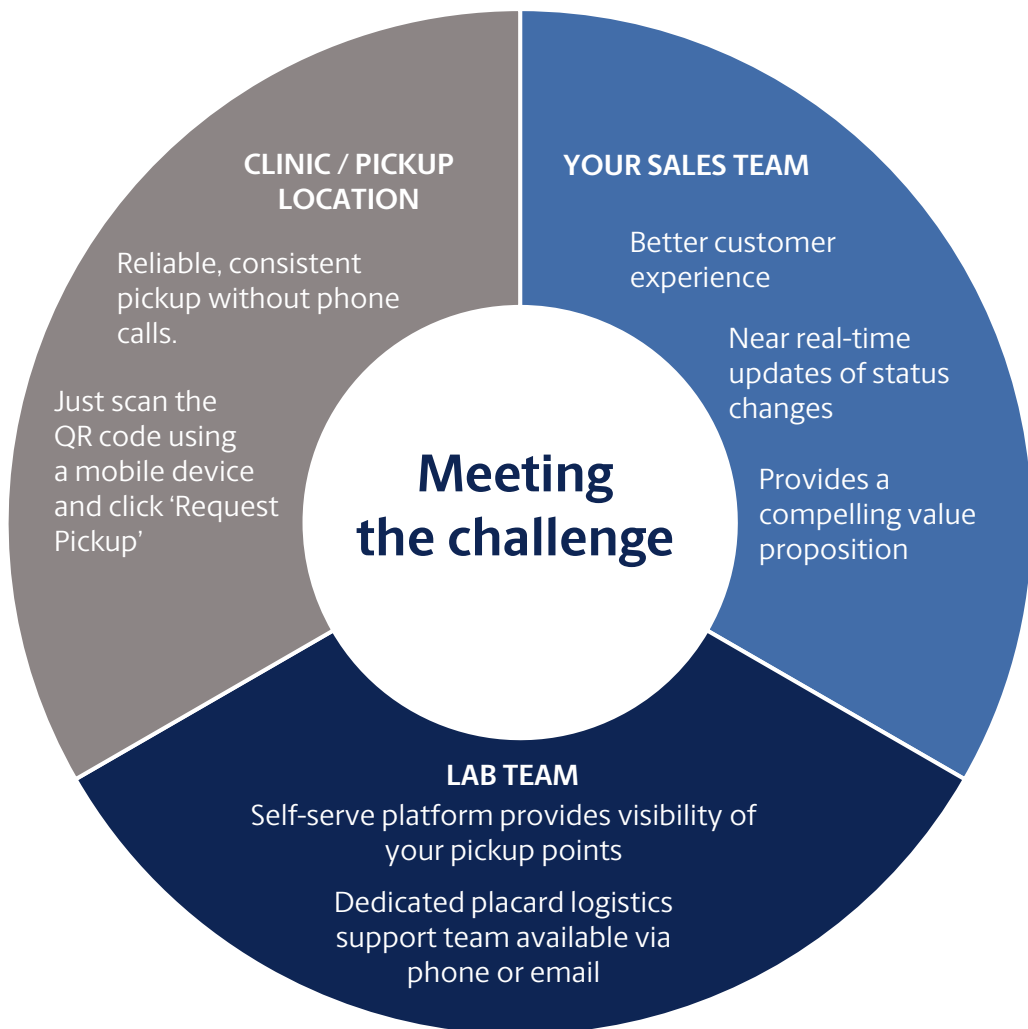

VISIBILITY

Scan-enabled monitoring tools, including a dashboard and SMS/email alerts for enhanced visibility give you more control of your inbound packages from pickup to delivery
